DETAILED ACTION

Allowable Subject Matter

1. Claims 1-4 are allowed.
2. The following is an examiner's statement of reasons for allowance.

Latos et al. clearly teaches the construction of an engine generator apparatus for rectifying and converting an alternating output of a generator, which has multi-phase windings and is driven by an engine, and converting the rectified output by an inverter into an alternating current at the frequency of a power system and the alternating current is interconnected with the source of said power system.

Bogel teach the construction of an automatic transfer control device having means for starting the interconnection with the system source when a direct current voltage rectified rises up to first predetermined level after the start up of the engine, and means for canceling the interconnection when the direct current voltage drops down to below second predetermined level.

Dalstein teach the use of a method for generating a fault indication signal comprising fault detecting means (40) for judging that the power generator has a fault, and means where a generator fault signal (S) is outputted.

The prior art of record, taken alone or in combination, fails to teach the construction of a grid-connected type engine generator apparatus for rectifying and converting an alternating output of a generator as disclosed on independent claim 1, comprising a fault detecting means for judging that the power generator has a fault when the direct current voltage drops down to below the second predetermined level after the re-starting of the connection.

Art Unit: 2834

Dependent claims 2-4 are considered allowable by their dependence on allowed independent claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
